

FREE PRINTABLE: PIPITY DORIS THE DORMOUSE

How To Make:

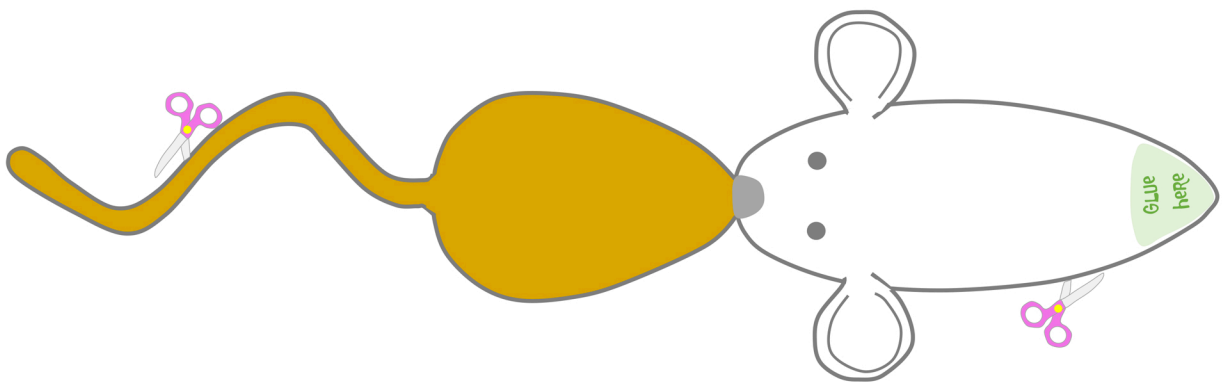

1. Colour-in the mouse's body on this side of the page, then flip the page over and colour-in the tail. Once you have done that cut-out following the outer grey line.

3. Gently bend the top and bottom of the ears forward, to create a slight curve

2. Spread some glue on the green 'glue here' area at the back of the mouse's body. Then turn over, fold and gently press along the dotted lines and roll the body back towards the tail, tuck under the glued area and stick down onto the back-body area, next to the tail.
